Topic: Cybersecurity Platforms

Competitive Intelligence Briefing Report

EXECUTIVE SUMMARY

The cybersecurity landscape is rapidly evolving, characterized by significant product innovations and a robust market growth trajectory. Key findings indicate that the global cybersecurity market is projected to expand from USD 219 billion in 2023 to USD 578.2 billion by 2033, driven by increasing cyber threats and a demand for advanced security solutions. Notable product updates from Cisco and Absolute Security highlight the ongoing innovation in this sector.

COMPETITOR PRICING

Unverified information -- omitted from final report.

COMPETITOR PRODUCT UPDATES

- Cisco: Cisco has launched a new extended detection and response (XDR) platform, integrating network detection and response (NDR) with endpoint detection and response (EDR) capabilities. This platform is designed to enhance security operations by providing a more comprehensive threat detection and response mechanism. - Absolute Security: Absolute Security has unveiled the Lenovo ThinkShield TraceLock, which empowers customers to maintain control, security, and resilience across offline PCs. This product aims to enhance endpoint security for users managing devices that may not always be connected to the network. Source: Press Releases

MARKET SIGNALS

- The global cybersecurity market was valued at USD 219 billion in 2023 and is anticipated to grow to USD 578.2 billion by 2033, reflecting a compound annual growth rate (CAGR) of 10.4%. This growth is indicative of the increasing investment in cybersecurity solutions by organizations worldwide. - Cybersecurity has emerged as a critical concern for organizations, driven by rising rates of cyberattacks and an escalating demand for sophisticated security solutions. Source: Cybersecurity Market Trends, Data Protection Demand and Forecast 2025 to 2035

STRATEGIC RECOMMENDATIONS

1. Invest in AI and Machine Learning: Given the trend towards integrating AI and machine learning in cybersecurity solutions, companies should prioritize investments in these technologies to enhance threat

detection and response capabilities.

- 2. Focus on Endpoint Security: With the introduction of products like Lenovo ThinkShield TraceLock, there is a clear market demand for robust endpoint security solutions. Companies should consider developing or enhancing their offerings in this area.
- 3. Expand Market Reach: As the cybersecurity market is projected to grow significantly, businesses should explore opportunities to expand their market presence, particularly in regions with increasing cybersecurity needs.
- 4. Enhance Product Integration: Following Cisco's lead in integrating NDR and EDR, companies should consider developing platforms that provide comprehensive security solutions by merging various detection and response capabilities.
- 5. Monitor Cyber Threat Trends: Organizations should continuously monitor the evolving landscape of cyber threats to adapt their security strategies and product offerings accordingly.
